Dear Mr. Parenti,

Thank you for enabling my office to acquire the Mattioli Ultrapeel Transderm Ionto System. This device has been used here in our SPA-MD by my staff and has been found to work very well for both microdermabrasion and Transdermal delivery. We have been using both the probes (Ionto and Ionto Lips) for transdermal delivery of ionic collagen as test treatment for skin resurfacing on a few groups of volunteers and the initial results were astonishing.

The Transderm Ionto has been used at various levels of current with a very low threshold of discomfort and seems to be very promising even for other kinds of ionic solutions.

Thank you for your assistance on the device.

I look forward to keeping in touch with you and your company.

Sincerely,

Mitchel P. Goldman, M.D.
