Simone Perenti
Mattioli Engineering Corporation

Dear Simone:

Thank you for sending us the Ultrapeel Transderm Iontophoresis system. We plan to investigate the use of this system to enhance percutaneous delivery of drug molecules and small molecular weight proteins. This technology may be useful in the immunotherapy of tumors, or for treating inflammatory skin diseases. We look forward to collaborating with you and your company, and as these studies move forward, I will keep you updated on our progress.

Sincerely,

Mark Naylor, M.D.
